1 Great Sandy Marine Park contributions

The following map identifies the proportion of aquarium fish fishery catch within each grid site that is assessed to be impacted by the zoning and management changes that will come into effect under the new Great Sandy Marine Park Zoning Plan. These percentages will inform loss of income payment calculations for aquarium fish fishers operating within the Great Sandy Marine Park.

1.1 Proportion of aquarium fish fishery (A1 and A2) catch impacted in each grid site in the Great Sandy Marine Park

1.2 Master table of contributions from aquarium fish fisheries in the Great Sandy Marine Park

	Payment category (% of catch from each grid site that will contribute to payment)
Grid site reference (see maps above)	Aquarium fish (A1, A2) %

2 Gulf of Carpentaria gillnet free areas

The following maps identify the location of new gillnet free areas in the Gulf of Carpentaria and the proportion of N3 and N11 catch within each grid site that is assessed to be impacted by the new gillnet free areas. These percentages will inform loss of income payment calculations for impacted N3 and N11 symbol holders in the Gulf of Carpentaria.

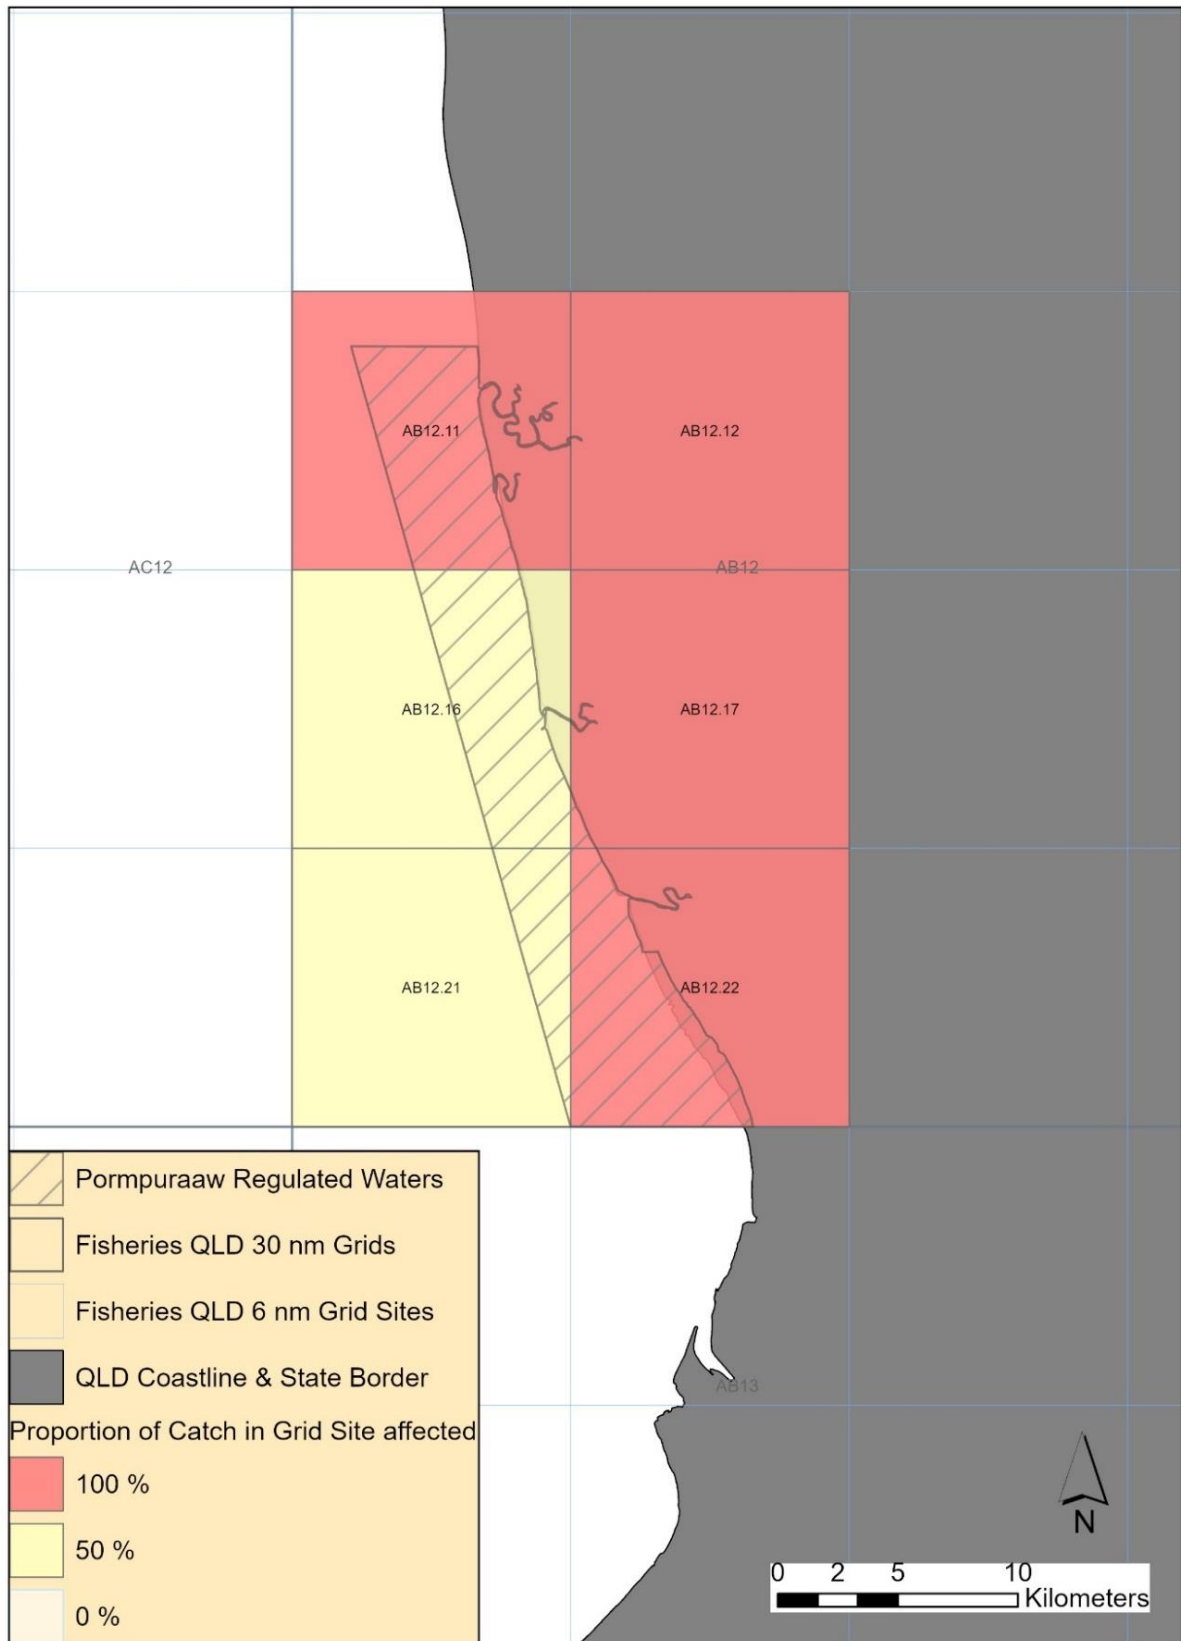

2.1 Location of new gillnet free areas impacting N3 and N11 catch in the Gulf of Carpentaria

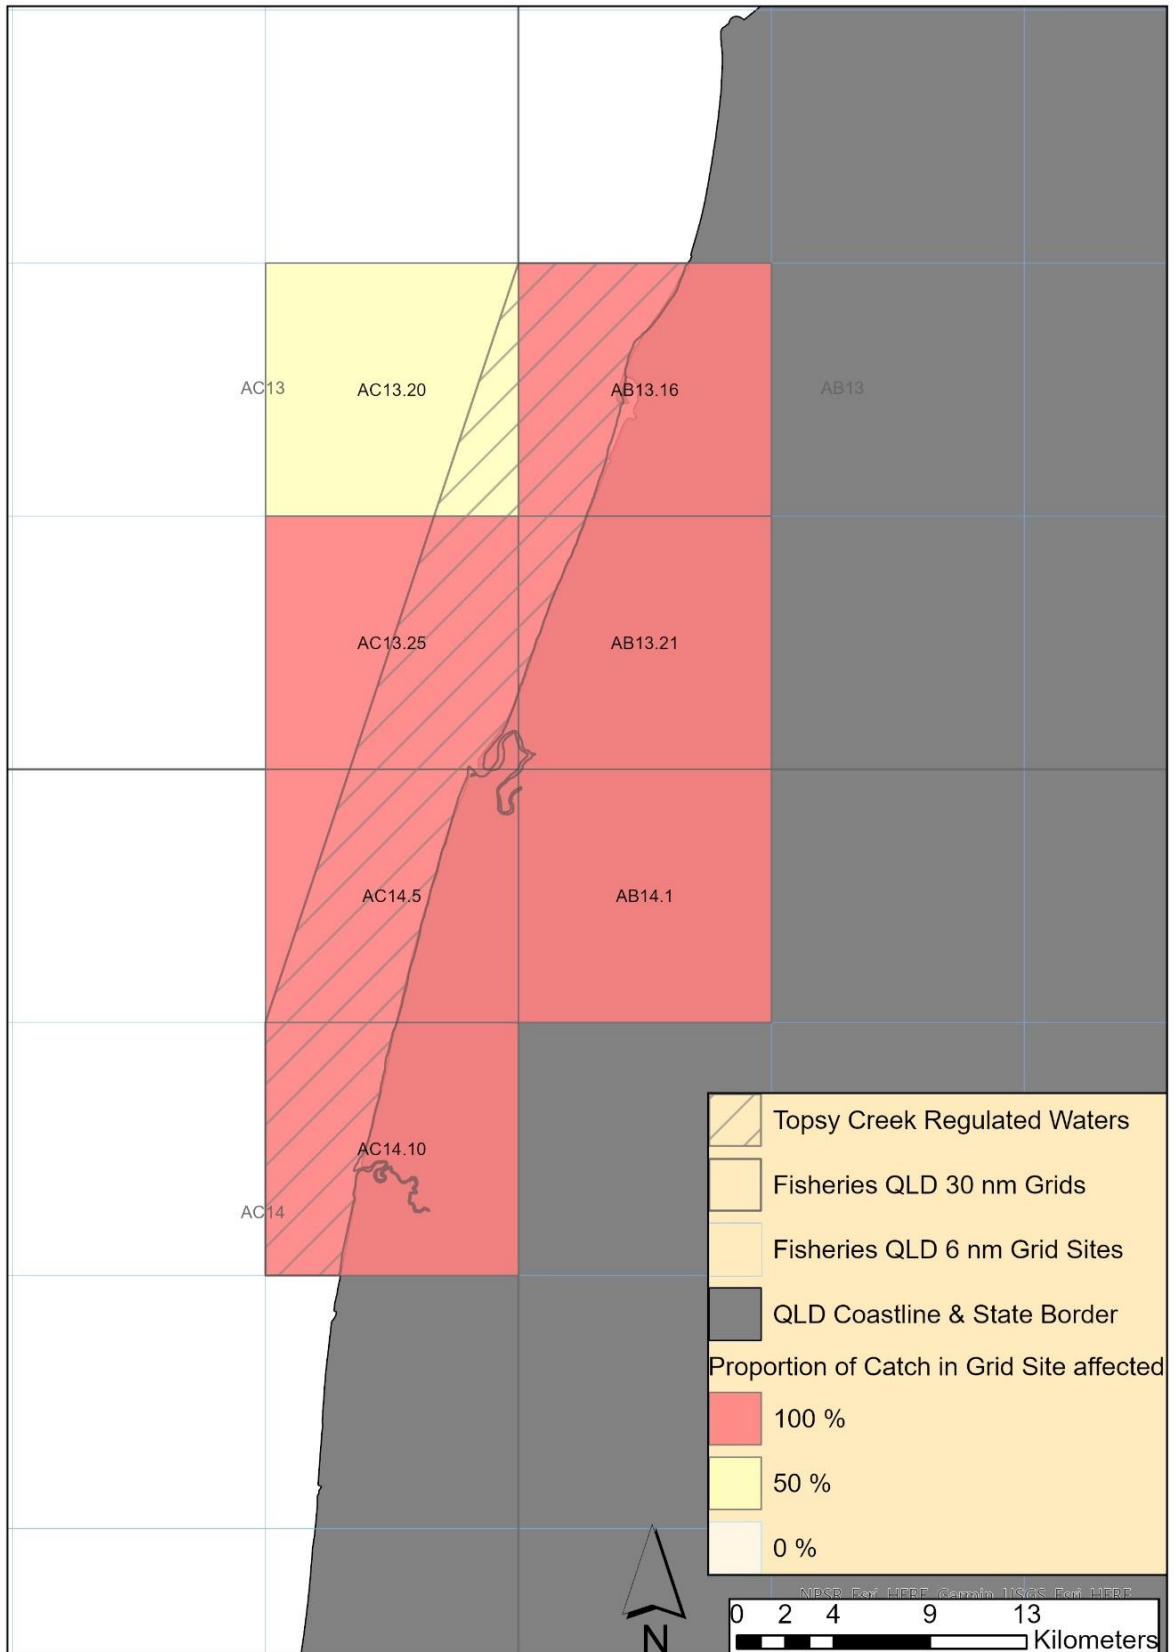

2.2 Proportion of N3 and N11 catch impacted in each grid site in the northern Gulf waters

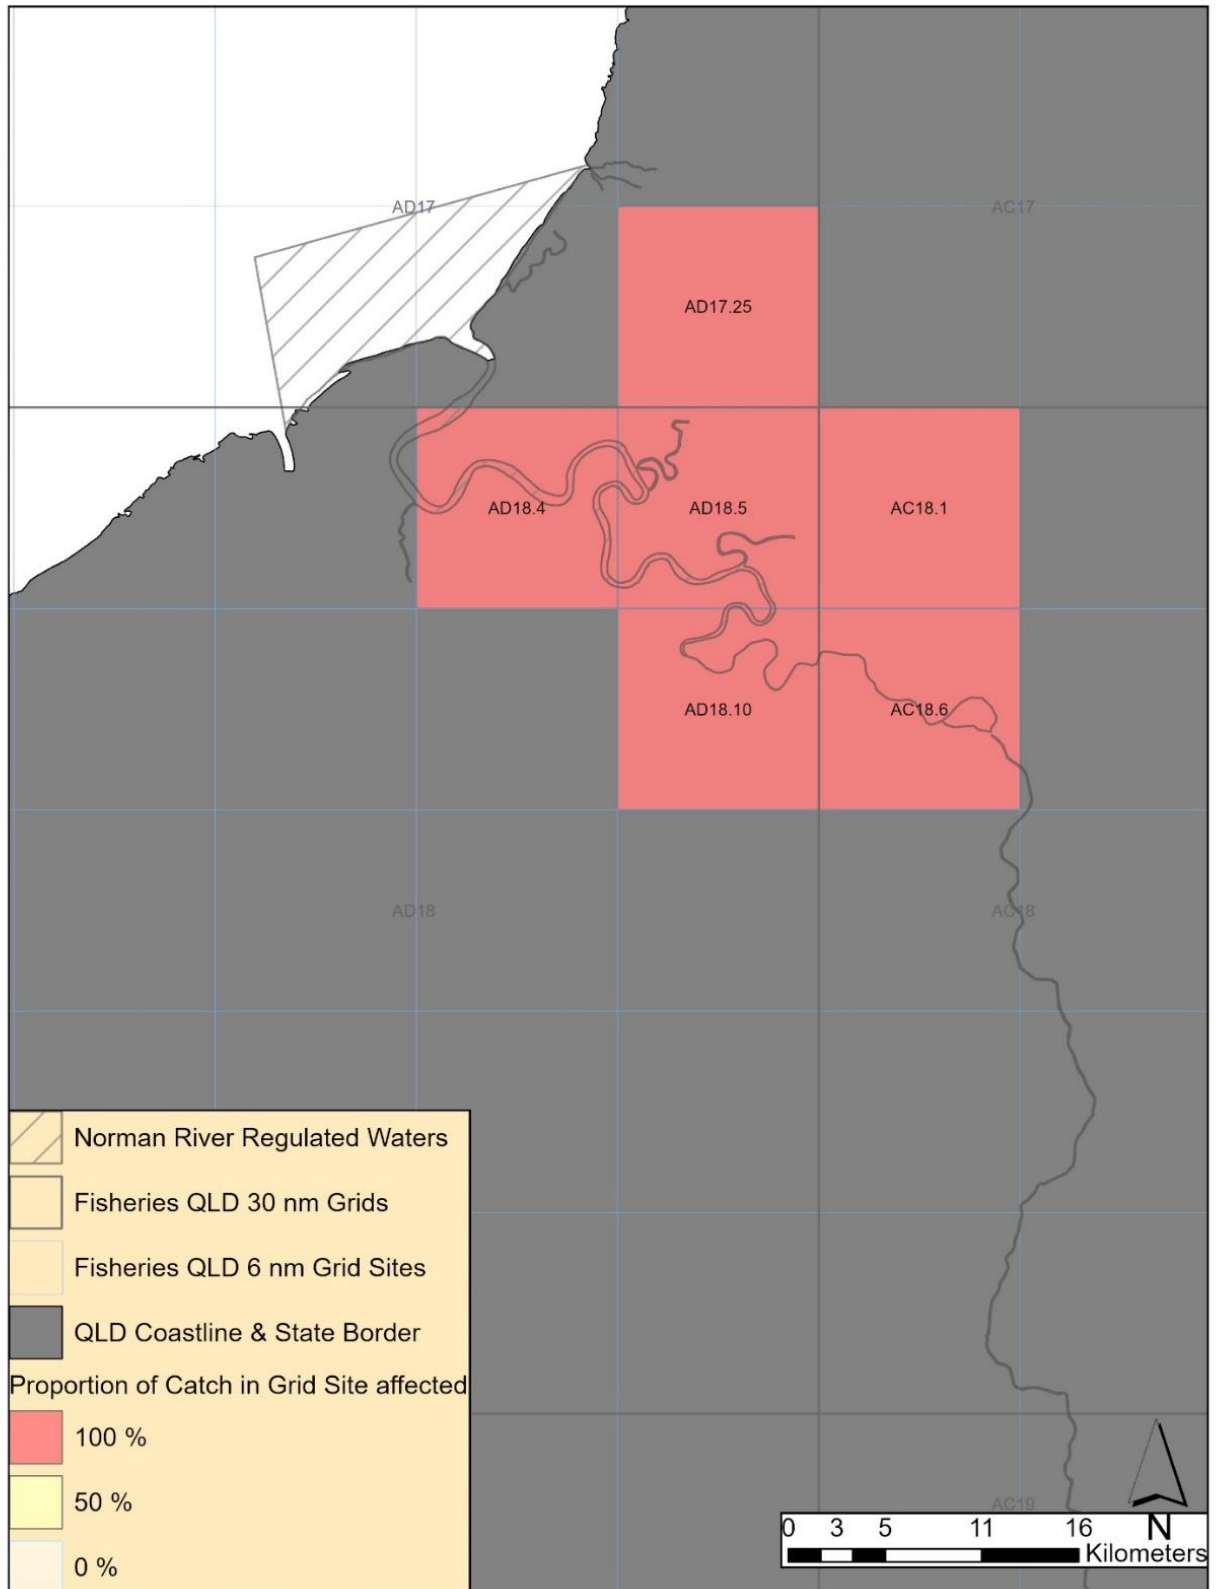

2.3 Proportion of N3 and N11 catch impacted in each grid site in the Pormpuraaw waters

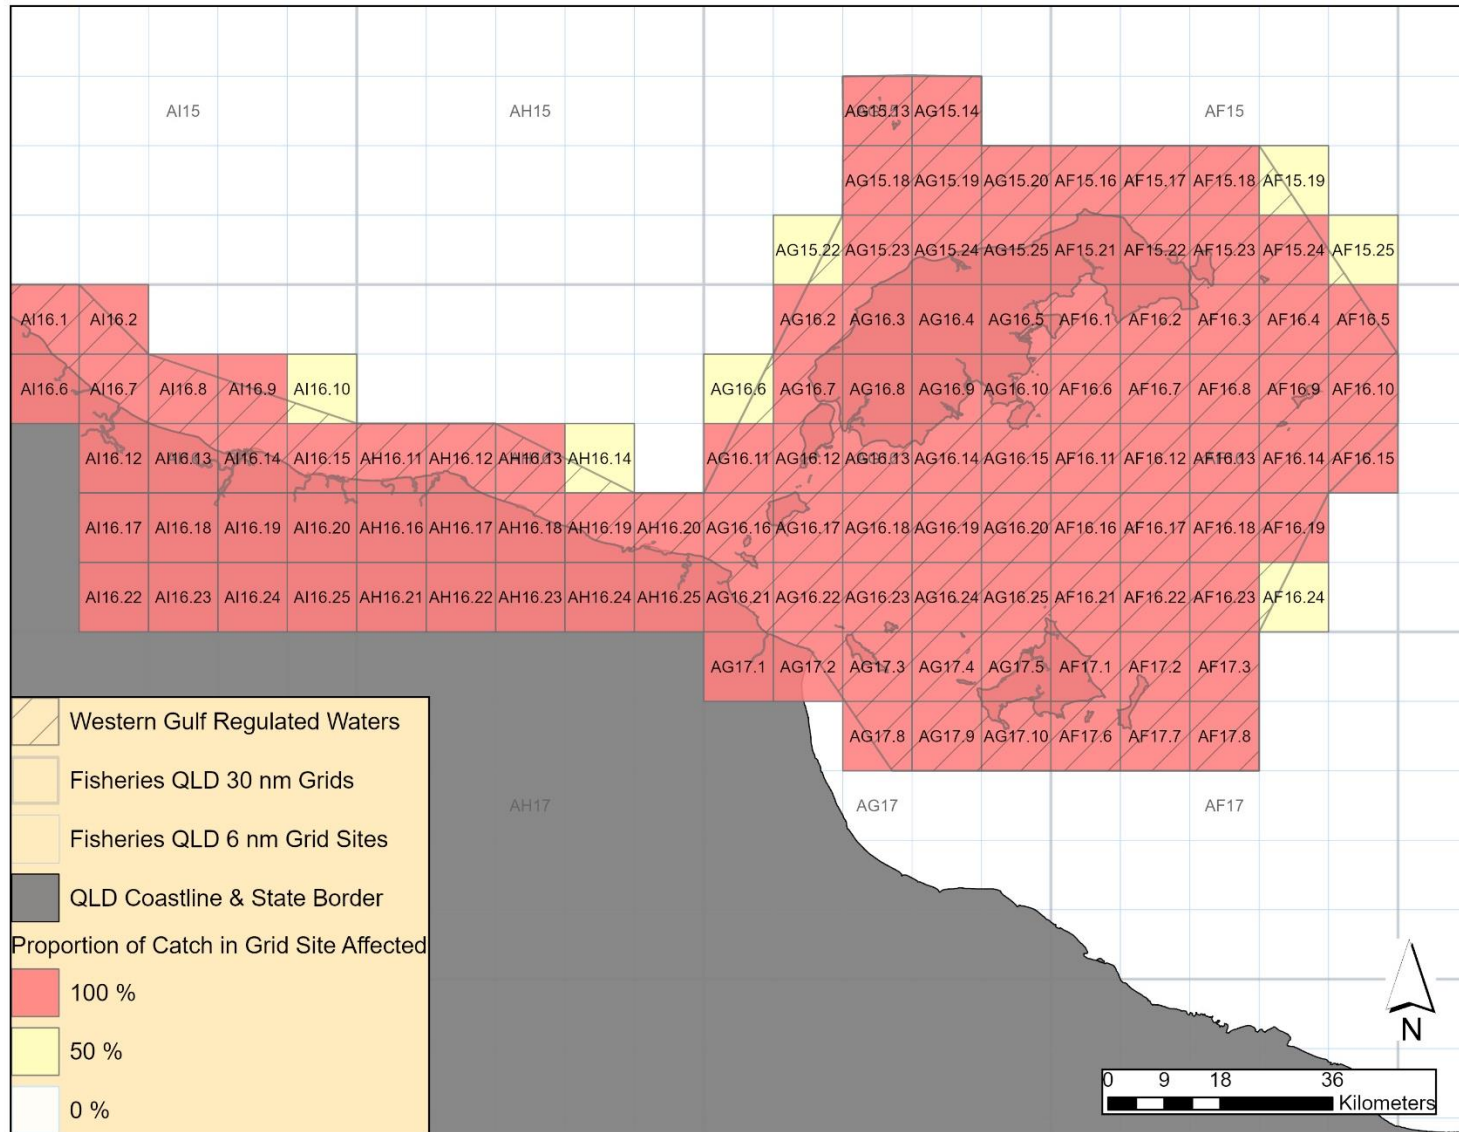

2.4 Proportion of N3 and N11 catch impacted in each grid site in the Topsy Creek

2.5 Proportion of N3 and N11 catch impacted in each grid site in the Norman River

2.6 Proportion of N3 and N11 catch impacted in each grid site in the western Gulf waters

2.7 Master table of contributions from N3 and N11 symbols in the Gulf of Carpentaria gillnet free areas

3 Price multiplier

The price multiplier incorporates the industry average beach price per year, as estimated by BDO EconSearch*, further adjusted for the Consumer Price Index to create projected prices for financial years 2024/25, 2025/26 and 2026/27, which are then combined into a single total.

Where a species has not been valued by BDO, a suitable substitute is used.

*BDO Econsearch were engaged to undertake economic and social data analysis on fisheries for Fisheries Queensland (<https://www.daf.qld.gov.au/business-priorities/fisheries/monitoring-research/data/economic-and-social-data>)

Fishery	BDO Species Name	Price Multiplier (per kilogram)
